

2025 *Excelencia* in Education Technical Assistance Opportunities

Excelencia in Education's mission is to accelerate Latino student success in higher education. We are committed to significantly increasing the number of Latino students earning college degrees by 2030 in partnership with institutions.

To support and reinforce institutional capacity to more intentionally serve, *Excelencia* has created a technical assistance strategy to meet institutions where they are in their transformation journey. *Excelencia*'s technical assistance offers institutional teams the time and space to learn and share strategies that advance institutional efforts to align data, practice, and leadership as a community of learners and practice committed to more intentionally SERVING their Latino, and all, students.

Excelencia's technical assistance offers institutions, as cohorts of peer institutions, the opportunity to examine their own data, practice, and leadership strategies and develop capacity to increase Latino student outcomes in the six components of the Seal of *Excelencia* framework: 1) enrollment of Latino students; 2) retention of Latino students; 3) transfer in and out of Latino students; 4) financial support for Latino students; 5) representation of Latinos in administration, faculty, and staff to further model success; and 6) graduation of Latino students. The learning and knowledge gained through *Excelencia*'s technical assistance builds momentum and increases institutional capacity to transform into learning environments where Latino, and all, students thrive.

For 2025, *Excelencia* offers the following **technical assistance institutes** to build and support institutional capacity:
